

OBJECT ID	F2013.86
OBJECT NAME	Amplifier, Audio
DATE CREATED	circa 1969
MATERIAL	Metal; Plastic; Wood
ACCESS POINTS	Radio Receiver Scott Tuner

OBJECT DESCRIPTION

Scott 382-C Solid State Stereo Receiver was found in collections. The receiver has outputs for speakers and inputs for a record player and another audio device. The receiver has an AM/FM radio tuner. It has knobs to adjust for base, treble, balance, and loudness. There is a jack for headphones. There is a detachable dark wooden top and side cover. Does not turn on when plugged in.

ORIGIN

Receiver often refers to a combination of a tuner, a preamplifier, and a power amplifier all on the same chassis. This allowed for an easier and economical home stereo system.
